

Can You Help?

Five of our successful secondary students with Caleb (From left) Brian, John, Caleb, Kelvin, Dennis and Steven

Two of our successful secondary students, Brian and Steven very much want to go to university in September but we desperately need sponsors to let them do so. The cost for each student would be a maximum of £1,400 a year for four years on a state sponsored degree course. If gift-aided that would reduce the net amount to £94 a month; this could reduce further as they should qualify for a government student loan. We know that £94 a month is a large amount for one person to support but any financial commitment to partially support these young people for the four years of their course would be gratefully received.

We hope that we can find the money to enable these two young people to attend university from September but to do that we need to find funding for them soon. So this is a specific appeal to help us do that. Can you or your church or school help to give these two young people this opportunity and really make a difference to their life? Please let Terry Newton(uhuru.ministries@gmail.com) or David Innes(davidianinnes@btinternet.com) know if you can help in any way.

Brian M Terry writes: "This is a young man that from the time he came to my notice has proved himself more than reliable, honest and helpful. Sadly some years back he got a sponsor that appeared very committed to him but for one reason or another that sponsor just dropped her support and contact with him. I know that was a great disappointment to him."

Brian writes: "I am the fifth eldest of a family of seven. My parents have always made our family happy though they are not financially stable, and unable to support us through our studies. Having completed my high school education with an A- it is my greatest hope that I might get the chance to study engineering at university. I am forever grateful for the support my family has been receiving from the more than kind Uhuru organization to get us through our education. It is my prayer that the Almighty God showers the organization with blessings for the hand that giveth also receiveth."

Steven Z Terry writes: "Steven wanted to pursue medical training. His plain A grade could have been sufficient for this but like the UK there is huge competition for places. It is likely that he will be accepted for his second choice of engineering. Uhuru has supported Steven over the past four years and he has done incredibly well considering the family background.

Steven writes: 'I was born to a family of two boys, Alphonse and I. I have never known my father but am glad to know my mother though she suffers from epilepsy and other problems, and I have been brought up in the main by my aunt, who sadly is a widow. I have been able to go through primary and secondary and I am so very thankful to Uhuru for enabling me to go through secondary. I hope and pray that Uhuru through your help will be able to also take me through degree level. One day I would like to support Grace Home (Uhuru) in some way, Grace Home has been like a second home to me. I can't say much more but 'thank you'.
